

Global Investment Grade Credit Fund

- The Fund may invest primarily in investment grade corporate fixed income instruments.
- Investments in fixed income securities are subject to interest rate, credit and downgrade risks. The Fund is also subject to risks of investing in high yield, below investment grade and unrated securities.
- It is subject to the risks associated with investment, global investment, emerging markets, sovereign debt, mortgage-related and other asset-backed securities, currency, liquidity and repurchase / reverse repurchase transactions.
- It may invest more than 10% in non-investment grade securities issued or guaranteed by a single sovereign issuer (e.g. Sri Lanka and Hungary) which may be subject to increased credit risk and risk of default.
- It may invest extensively in financial derivative instruments which may involve additional risks (e.g. market, counterparty, liquidity, volatility, and leverage risks).
- It may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share.
- Investments involve risks and your investment may suffer significant losses.
- Investors should not rely solely on this material and should read the offering document of the Fund for further details including the risk factors.

PERFORMANCE SUMMARY

The Global Investment Grade Credit Fund returned 1.18% (E, Income shares net of fees) and 1.19% (E, Accumulation shares net of fees) in March. Year-to-date the Fund has returned 0.19% (E, Income shares net of fees) and 0.17% (E, Accumulation shares net of fees).

The Bloomberg Global Aggregate Credit Index outperformed like-duration government bonds by 0.4% over the month, while spreads tightened by 4bps to 92bps.

Contributors

- Tactical exposure to securitized products, as select agency mortgage-backed securities outperformed as spreads tightened
- An overweight to and security selection within banking and brokerage, as the sector and select senior and subordinated bonds outperformed
- Security selection within emerging markets external debt, as select overweight emerging markets sovereign issuers outperformed

Detractors

- Security selection within finance companies, as a select issuer underperformed amid concerns over weakening operating fundamentals
- Security selection within media, as a select issuer underperformed amid negative ratings actions

MONTH IN REVIEW

Global investment grade credit spreads tightened by 4bps in March to 92bps. Risk assets continued to rally over the month as lingering concerns over a macroeconomic slowdown receded further, reinforced by a set of resilient prints in growth indicators. That said, US inflation has continued to prove stickier than expected, with CPI data for February printing slightly above market expectations. Against this backdrop, the Bloomberg Global Aggregate Credit Index outperformed like-duration government bonds by 0.4% in March, with a total return of 1.2% (USD hedged) over the month. On the primary market front, March saw \$141bn of gross issuance in U.S. investment grade credit, rounding out a markedly busy first quarter, with issuance for the quarter up 27% versus the average over the last five years. From a sectorial performance standpoint, the communications and energy sectors outperformed during the month on an excess return basis, while capital goods and transportation-related issuers lagged.

Developed market central banks have remained relatively dovish in their forward guidance. The Fed again held rates steady but signaled a readiness to start cutting interest rates this summer should inflation continue to moderate. The ECB similarly kept rates unchanged while expressing increased confidence regarding moderating inflation going forward. Meanwhile in Japan, the BoJ signaled an end to its negative interest rate and yield curve control policies, marking the beginning of a return to a more normalized interest rate environment.

Ratings momentum remained positive, extending a multi-year upgrade cycle. Following record downgrades in 2020, the market experienced a remarkable upgrade cycle over the past three years, with \$278bn of rising stars versus only \$48bn of fallen angels in USD debt in the 2021 to 2023 period. Ratings momentum remained positive during the first quarter of the year, with the total volume of upgrades from HY to IG adding approximately \$9bn of rising stars, versus \$5bn of fallen angels.

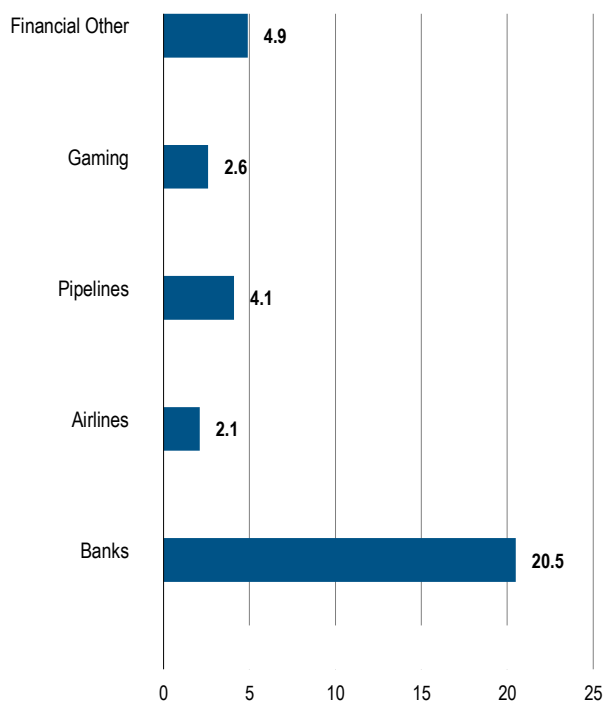

PORTFOLIO POSITIONING

We remain selective on generic corporate credit risk and focus on bottom-up credit selection, emphasizing resilient issuers with positive rating trajectories and attractive valuations.

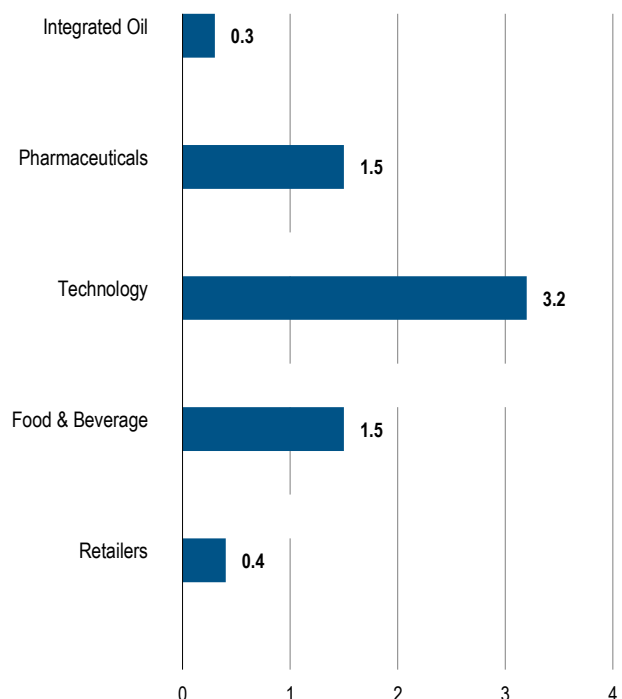

We remain constructive on the gaming and airline sectors, as continued strength in leisure and business travel as well as strong consumer demand is feeding through to material earnings improvements and de-leveraging potential. In addition, we continue to prefer sectors with asset coverage and good earnings visibility, such as pipelines and wireless tower companies. Within financials, we favor the senior debt of large national champion banks, which are well positioned following more than a decade of restructuring, de-risking, and de-leveraging. We remain underweight to issuers with limited upside potential and heightened re-leveraging risk, including in sectors such as food & beverage and pharmaceuticals, and we similarly take a more cautious approach within sectors with asset-light business models or more shareholder-friendly balance sheet practices such as technology.

During the month, the Fund selectively added exposure to issuers in the banking and brokerage sectors, taking advantage of several attractively priced deals in the primary market, whilst also adding to issuers in the utilities and real estate sectors. Conversely, the Fund trimmed its exposure to select issuers in the media cable sector.

Top 5 underweights (% Market Value)

OUTLOOK AND STRATEGY

Resilient fundamentals

Investment grade credit fundamentals have remained resilient thus far as earnings as well as debt leverage metrics have remained relatively stable over recent quarters. Slowing consumer demand and margin pressures continue to represent headwinds for select industries and issuers, and tightening credit conditions remain a downside risk over the cyclical horizon. That said, given strong starting levels, credit fundamentals are generally expected to remain resilient even in a downturn. Accordingly, the ratings momentum both in the crossover space and within the investment grade market remained meaningfully positive in 2023, marking the third year in a remarkable upgrade cycle. While the ratings momentum has remained positive in the first quarter of 2024, downgrades may increase going forward as growth slows.

Supportive technicals

Demand for global investment grade credit remains strong, especially driven by yield-focused buyers and institutional flows, as investors seek high-quality, income-producing assets while pension funds de-risk on the back of improved funding ratios. While gross issuance has had a strong start to the year, net supply is likely to decline this year due to higher maturities. Additionally, the ECB is continuing to engage in balance sheet reduction, although the impact on the market has been limited to date.

Attractive all-in yields

All-in yields remain elevated compared to the last 15 years and yields around current levels have historically represented attractive entry points for long-term investors. In this environment, non-cyclicals, select consumer-oriented sectors, defensive BBBs, new issues, and potential rising stars continue to offer attractive opportunities, while ongoing macro volatility and recession risk may lead to downside scenarios in lower quality credits.

Source: PIMCO, index provider for benchmark data.

Rising star: a bond whose credit rating was upgraded from high yield to investment grade status.

Fallen angel: a bond whose credit rating was downgraded from investment grade to high yield status.

[#]Duration is a measure of a portfolio's price sensitivity expressed in years. PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security.

[†]Annualised distribution yield= (Dividend Rate * 4) / NAV on ex-dividend day. Annualised Distribution Yield is as of 31/03/2024. Dividend is not guaranteed. Dividend may pay out of capital. A positive distribution yield does not imply a positive return.

Duration is a measure of a portfolio's price sensitivity expressed in years. Effective duration is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change.

[⊕]PIMCO calculates a Fund's Estimated Yield to Maturity by averaging the yield to maturity of each security held in the Fund on a market weighted basis. PIMCO sources each security's yield to maturity from PIMCO's Portfolio Analytics database. When not available in PIMCO's Portfolio Analytics database, PIMCO sources the security's yield to maturity from Bloomberg. When not available in either database, PIMCO will assign a yield to maturity for that security from a PIMCO matrix based on prior data. The source data used in such circumstances is a static metric and PIMCO makes no representation as to the accuracy of the data for the purposes of calculating the Estimated Yield to Maturity. The Estimated Yield to Maturity is provided for illustrative purposes only and should not be relied upon as a primary basis for an investment decision and should not be interpreted as a guarantee or prediction of future performance of the Fund or the likely returns of any investment.

Performance data shown is the after the effect of fees. All periods longer than one year are annualised.

Performance data shown is the after the effect of fees. All periods longer than one year are annualised. Past performance is no guarantee of future results. Investment involves risk including possible loss of the principal amount invested. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. The Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), have different minimum investment requirements and are entitled to different services. In an environment where interest rates may trend upward, rising rates will negatively impact most bond funds, and fixed income securities held by a fund are likely to decrease in value. Bond funds and individual bonds with a longer duration (a measure of the expected life of a security) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations.

Statements concerning financial market trends or portfolio strategies are based on current market conditions, which will fluctuate. There is no guarantee that these investment strategies will work under all market conditions or are suitable for all investors and each investor should evaluate their ability to invest for the long term, especially during periods of downturn in the market. Outlook and strategies are subject to change without notice.

Bloomberg Global Aggregate Credit Index (USD Hedged) is an unmanaged Index that provides a broad-based measure of the global investment-grade fixed income markets. The three major components of this index are the U. S. Aggregate, the Pan-European Aggregate, and the Asian-Pacific Aggregate Indices. This index excludes Government and Securitised Securities. The index also includes Eurodollar and Euro-Yen corporate bonds, Canadian securities, and USD investment grade 144A securities. It is not possible to invest directly in an unmanaged index.

Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

A word about risk: Investing in the **bond market** is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Bonds and bond strategies with longer durations tend to be more sensitive and volatile than those with shorter durations; bond prices generally fall as interest rates rise, and low interest rate environments increase this risk. Reductions in bond counterparty capacity may contribute to decreased market liquidity and increased price volatility. Bond investments may be worth more or less than the original cost when redeemed. Investing in **foreign denominated and/or domiciled securities** may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. Sovereign securities are generally backed by the issuing government, obligations of U.S. Government agencies and authorities are supported by varying degrees but are generally not backed by the full faith of the U.S. Government; portfolios that invest in such securities are not guaranteed and will fluctuate in value. **Mortgage and asset-backed securities** may be sensitive to changes in interest rates, subject to early repayment risk, and while generally supported by a government, government-agency or private guarantor there is no assurance that the guarantor will meet its obligations. **High-yield**, lower-rated, securities involve greater risk than higher-rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. **Derivatives** may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. **Diversification** does not ensure against loss.

PIMCO Funds: Global Investors Series plc is an umbrella type open-ended investment company with variable capital and is incorporated with limited liability under the laws of Ireland with registered number 276928. Investors should consider the investment objectives, risks, charges and expenses of this fund carefully before investing. This and other information are contained in the fund's prospectus, which may be obtained at www.pimco.com.hk or by contacting the Hong Kong Representative or your fund distributor and/or financial advisor.

Benchmark - Unless referenced in the prospectus, a benchmark or index in this material is not used in the active management of the Fund, in particular for performance comparison purposes.

Where referenced in the prospectus, a benchmark may be used as part of the active management of the Fund including, but not limited to, for duration measurement, as a benchmark which the Fund seeks to outperform, performance comparison purposes and/or relative VaR measurement. Any reference to an index or benchmark in this material, and which is not referenced in the prospectus, is purely for illustrative or informational purposes (such as to provide general financial information or market context) and is not for performance comparison purposes. Please contact your PIMCO representative for further details.

Correlation - As outlined under "Benchmark", where disclosed herein and referenced in the prospectus, a benchmark may be used as part of the active management of the Fund. In such instances, certain of the Funds securities may be components of and may have similar weightings to the benchmark and the Fund may from time to time show a high degree of correlation with the performance of any such benchmark. However the benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.

Investors should note that a Fund may from time to time show a high degree of correlation with the performance of one or more financial indices not referenced in the prospectus. Such correlation may be coincidental or may arise because any such financial index may be representative of the asset class, market sector or geographic location in which the Fund is invested or uses a similar investment methodology to that used in managing the Fund. **Additional Information** - This material may contain additional information, not explicit in the prospectus, on how the Fund or strategy is currently managed. Such information is current as at the date of the presentation and may be subject to change without notice. **Investment**

Restrictions - In accordance with the UCITS regulations and subject to any investment restrictions outlined in the Funds prospectus, the Fund may invest up to 100% of its net assets in different transferable securities and money market instruments issued or guaranteed by any of the following: OECD Governments (provided the relevant issues are investment grade), Government of Singapore, European Investment Bank, European Bank for Reconstruction and Development, International Finance Corporation, International Monetary Fund, Euratom, The Asian Development Bank, European Central Bank, Council of Europe, Eurofima, African Development Bank, International Bank for Reconstruction and Development (The World Bank), The Inter American Development Bank, European Union, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), Student Loan Marketing Association (Sallie Mae), Federal Home Loan Bank, Federal Farm Credit Bank, Tennessee Valley Authority, Straight-A Funding LLC, Government of the Peoples Republic of China, Government of Brazil (provided the issues are of investment grade), Government of India (provided the issues are of investment grade).
