

US High Yield Bond Fund

- The Fund may invest primarily in high yield fixed income instruments.
- Investments in fixed income securities are subject to interest rate, credit and downgrade risks. The Fund is also subject to risks of investing in high yield, below investment grade and unrated securities.
- It is subject to risks associated with emerging markets, sovereign debt, currency, liquidity, repurchase / reverse repurchase transactions.
- It may invest more than 10% in non-investment grade securities issued or guaranteed by a single sovereign issuer (e.g. Sri Lanka and Hungary) which may be subject to increased credit risk and risk of default.
- It may invest extensively in financial derivative instruments which may involve additional risks (e.g. market, counterparty, liquidity, volatility, and leverage risks).
- It may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share.
- Investments involve risks and your investment may suffer significant losses.
- Investors should not rely solely on this material and should read the offering document of the Fund for further details including the risk factors.

CLASS ACCUMULATION AND INCOME SHARES

Fund Description

The US High Yield Bond Fund is an actively managed portfolio that invests primarily in USD denominated high yield corporate bonds, with a maximum of 30% of its assets in securities rated lower than B. The fund is diversified broadly across industries and issuers on the basis of PIMCO's top-down and bottom-up processes.

This fund offers compelling diversification benefits and the opportunity to gain exposure to different sectors of the economy.

The fund employs PIMCO's fundamental research process, including top-down economic views, bottom-up security selection and extensive global resources. The Fund may use or invest in financial derivatives.

About the Benchmark

ICE BofAML US High Yield Constrained Index tracks the performance of US dollar denominated below investment grade rated corporate debt publically issued in the US domestic market. To qualify for inclusion in the index, securities must have a below investment grade rating (based on an average of Moody's, S&P, and Fitch) and an investment grade rated country of risk (based on an average of Moody's, S&P, and Fitch foreign currency long term sovereign debt ratings).

Unless otherwise stated in the prospectus, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.

ⒺPIMCO calculates a Fund's Estimated Yield to Maturity by averaging the yield to maturity of each security held in the Fund on a market weighted basis. PIMCO sources each security's yield to maturity from PIMCO's Portfolio Analytics database. When not available in PIMCO's Portfolio Analytics database, PIMCO sources the security's yield to maturity from Bloomberg. When not available in either database, PIMCO will assign a yield to maturity for that security from a PIMCO matrix based on prior data. The source data used in such circumstances is a static metric and PIMCO makes no representation as to the accuracy of the data for the purposes of calculating the Estimated Yield to Maturity. The Estimated Yield to Maturity is provided for illustrative purposes only and should not be relied upon as a primary basis for an investment decision and should not be interpreted as a guarantee or prediction of future performance of the Fund or the likely returns of any investment. ****Net Other Short Duration Instruments includes securities and other instruments (except instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position.

^Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds.

ⒻDuration is a measure of a portfolio's price sensitivity expressed in years. PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security. **PIMCO duration calculation with no adjustment on credit securities.

Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index.

Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2024 Morningstar Ltd.

All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. Investment involves risk including possible loss of the principal amount invested.

†Annualised distribution yield= (Dividend Rate * 4) / NAV on ex-dividend day. Annualised Distribution Yield is as of 31/03/2024. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. Investment involves risk. **Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.** Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. The Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), have different minimum investment requirements and are entitled to different services. In an environment where interest rates may trend upward, rising rates will negatively impact most bond funds, and fixed income securities held by a fund are likely to decrease in value. Bond funds and individual bonds with a longer duration (a measure of the expected life of a security) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations.

PIMCO Funds: Global Investors Series plc is an umbrella type open-ended investment company with variable capital and is incorporated with limited liability under the laws of Ireland with registered number 276928. Investors should consider the investment objectives, risks, charges and expenses of this fund carefully before investing.
