This material has been distributed for informational purposes only. Investment involves risk. The value of an investment and any income from it can go down as well as up. Investors may get back less than the amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and include reinvestment of dividends, as applicable. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. The Fund may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share. The fund may invest in financial derivative instruments which may involve additional risks (e.g. counterparty, liquidity, leverage and volatility risks). The fund may invest in high yield securities which may entail greater potential price volatility and may be less liquid than higher-rated securities. The fund may be subject to the risk of investing in emerging markets. Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.

Investors may get back less than the amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and include reinvestment of dividends, as applicable. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. The Fund may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share. The fund may invest in financial derivative instruments which may involve additional risks (e.g. counterparty, liquidity, leverage and volatility risks). The fund may invest in high yield securities which may entail greater potential price volatility and may be less liquid than higher-rated securities. The fund may be subject to the risk of investing in emerging markets. Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.

This material has been distributed for informational purposes only. Investment involves risk. The value of an investment and any income from it can go down as well as up. Investors may get back less than the amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and include reinvestment of dividends, as applicable. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. The Fund may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share. The fund may invest in financial derivative instruments which may involve additional risks (e.g. counterparty, liquidity, leverage and volatility risks). The fund may invest in high yield securities which may entail greater potential price volatility and may be less liquid than higher-rated securities. The fund may be subject to the risk of investing in emerging markets. Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.

This material has been distributed for informational purposes only. Investment involves risk. The value of an investment and any income from it can go down as well as up. Investors may get back less than the amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and include reinvestment of dividends, as applicable. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. The Fund may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share. The fund may invest in financial derivative instruments which may involve additional risks (e.g. counterparty, liquidity, leverage and volatility risks). The fund may invest in high yield securities which may entail greater potential price volatility and may be less liquid than higher-rated securities. The fund may be subject to the risk of investing in emerging markets. Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.

This material has been distributed for informational purposes only. Investment involves risk. The value of an investment and any income from it can go down as well as up. Investors may get back less than the amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and include reinvestment of dividends, as applicable. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. The Fund may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share. The fund may invest in financial derivative instruments which may involve additional risks (e.g. counterparty, liquidity, leverage and volatility risks). The fund may invest in high yield securities which may entail greater potential price volatility and may be less liquid than higher-rated securities. The fund may be subject to the risk of investing in emerging markets. Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.

This material has been distributed for informational purposes only. Investment involves risk. The value of an investment and any income from it can go down as well as up. Investors may get back less than the amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and include reinvestment of dividends, as applicable. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. The Fund may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share. The fund may invest in financial derivative instruments which may involve additional risks (e.g. counterparty, liquidity, leverage and volatility risks). The fund may invest in high yield securities which may entail greater potential price volatility and may be less liquid than higher-rated securities. The fund may be subject to the risk of investing in emerging markets. Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.

This material has been distributed for informational purposes only. Investment involves risk. The value of an investment and any income from it can go down as well as up. Investors may get back less than the amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and include reinvestment of dividends, as applicable. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. The Fund may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share. The fund may invest in financial derivative instruments which may involve additional risks (e.g. counterparty, liquidity, leverage and volatility risks). The fund may invest in high yield securities which may entail greater potential price volatility and may be less liquid than higher-rated securities. The fund may be subject to the risk of investing in emerging markets. Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.

This material has been distributed for informational purposes only. Investment involves risk. The value of an investment and any income from it can go down as well as up. Investors may get back less than the amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and include reinvestment of dividends, as applicable. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. The Fund may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share. The fund may invest in financial derivative instruments which may involve additional risks (e.g. counterparty, liquidity, leverage and volatility risks). The fund may invest in high yield securities which may entail greater potential price volatility and may be less liquid than higher-rated securities. The fund may be subject to the risk of investing in emerging markets. Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.
