

## PIMCO Funds: Global Investors Series plc Income Fund

---

- The Fund may invest primarily in fixed income instruments with varying maturities.
- Investments in fixed income securities are subject to interest rate, credit and downgrade risks. The Fund is also subject to risks of investing in high yield, below investment grade and unrated securities.
- It is subject to risks associated with emerging markets, mortgage-related and other asset-backed securities, sovereign debt, currency, liquidity and repurchase / reverse repurchase transactions.
- It may invest more than 10% in non-investment grade securities issued or guaranteed by a single sovereign issuer (e.g. Ukraine, Sri Lanka and Hungary) which may be subject to increased credit risk and risk of default.
- It may invest extensively in financial derivative instruments which may involve additional risks (e.g. market, counterparty, liquidity, volatility, and leverage risks).
- It may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share.
- Investments involve risks and your investment may suffer significant losses.
- Investors should not rely solely on this material and should read the offering document of the Fund for further details including the risk factors.

# PIMCO GIS Income Fund portfolio breakdown (% Gross Market Value)

As of 29 February 2024. SOURCE: PIMCO.

Gross Market Value (GMV%) is calculated differently than Percent Market Value (PMV%), which is the Fund's official sector reporting. GMV% does not include the notional value of swap exposures and excludes reverse repos from its calculation. "Government Related" includes nominal and inflation-protected Treasuries, agencies and FDIC-guaranteed and government-guaranteed corporate securities from the U.S., Japan, United Kingdom, Australia, Canada, and European Union. "Government-Related" excludes any interest rate linked derivatives used to manage the fund's duration exposure in the United States. Derivative instruments includes interest rate swaps, futures, and swap options. "ABS" contains traditional ABS, CLOs and CDOs. "Other" contains municipal securities and preferred stock or common stock obtained through restructuring opportunities.

Prior to October 2023 sector exposures were reported in terms of percent bond exposure (PBE%), which is defined as the market exposure inclusive of notional values. PBE% shows exposure to a given sector divided by the total assets of the Fund and does not utilize a derivative offset bucket like PMV%. Additionally, prior to October 2023, the "Government-Related" bucket excluded any interest rate linked derivatives used to manage our duration exposure in the following countries: the U.S., Japan, United Kingdom, Australia, Canada, and European Union (ex-peripheral countries defined as Italy, Spain, Cyprus, Malta, Portugal, and Greece). **Portfolio structure is subject to change without notice and may not be representative of current or future allocations.**

---

***Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. This and other information are contained in the fund's Hong Kong prospectus, if available. Encourage your clients to read them carefully.***

**Holdings** are subject to change without notice and may not be representative of current or future allocations.

Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

**Asset-backed securities** (ABS) are bonds or notes backed by financial assets.

**Collateralized Debt Obligations** (CDOs) are an investment grade security backed by a pool of bonds, loans or other assets.

**Collateralized loan obligation** (CLO) is a single security backed by a pool of debt.

**Collateralized mortgage obligation** (CMO) refers to a type of mortgage-backed security that contains a pool of mortgages bundled together and sold as an investment.

**A word about risk: Investing in the bond market is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Bonds and bond strategies with longer durations tend to be more sensitive and volatile than those with shorter durations; bond prices generally fall as interest rates rise, and low interest rate environments increase this risk. Reductions in bond counterparty capacity may contribute to decreased market liquidity and increased price volatility. Bond investments may be worth more or less than the original cost when redeemed. Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. Mortgage and asset-backed securities may be sensitive to changes in interest rates, subject to early repayment risk, and their value may fluctuate in response to the market's perception of issuer creditworthiness; while generally supported by some form of government or private guarantee there is no assurance that private guarantors will meet their obligations. High-yield, lower-rated, securities involve greater risk than higher-rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. Equities may decline in value due to both real and perceived general market, economic, and industry conditions. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested.**

**PIMCO Funds:** Global Investors Series plc is an umbrella type open-ended investment company with variable capital and is incorporated with limited liability under the laws of Ireland with registered number 276928. The information is not for use within any country or with respect to any person(s) where such use could constitute a violation of the applicable law. The information contained in this communication is intended to supplement information contained in the prospectus for this Fund and must be read in conjunction therewith. **PIMCO Funds:** Global Investors Series plc has appointed PIMCO Asia Limited as the Hong Kong Representative. Investors should consider the investment objectives, risks, charges and expenses of these Funds carefully before investing. This and other information is contained in the Fund's prospectus, which may be obtained at [www.pimco.com.hk](http://www.pimco.com.hk) or by contacting the Hong Kong Representative or your fund distributor and/or financial advisor.
